

TA(s) Consulted: [Name(s) of TA(s) you spoke to]

Project Title Here

1 Team Members

- Full Name 1 – Student ID – email@mcmaster.ca
- Full Name 2 – Student ID – email@mcmaster.ca
- Full Name 3 – Student ID – email@mcmaster.ca

2 Task Overview

[Describe the project at a high level. State the task title, what problem you are solving, why it matters, and what makes it non-trivial/challenging.]

3 Task Definition

[State clearly: What type of data are you using (text, image, tabular, audio, etc.)? Is this a classification, regression, or generation task? If classification, how many classes, and is it single-label or multi-label?]

4 Problem Description and Impact

[Explain the problem in more depth, its real-world significance/impact, and elaborate on the technical or practical challenges involved.]

5 Data Source(s) and Collection Plan

[Describe where your data comes from. Include:

- Links to the data source(s)
- If scraped: method and how you will respect terms-of-service / robots.txt
- If via API: how you will handle authentication and rate limiting
- If from Kaggle: BOTH the Kaggle link AND the original source link
- Available metadata for the corpus
- If data is unlabeled: your plan for labeling it, and estimated time per instance
- If not collected by you: details on how it was originally collected/annotated/preprocessed
- Whether you will use the full dataset or a subset, and your justification

6 Dataset Size and Example Data Points

[State the expected number of data points in your dataset (minimum 1,000).]

Example Data Points

1. **Input:** [example 1] **Label:** [label 1]
2. **Input:** [example 2] **Label:** [label 2]
3. **Input:** [example 3] **Label:** [label 3]

7 Proposed Solution

[Describe your planned approach:

- What features and target labels will you use?
- What model(s) will you try (no simple linear regression)?
- What existing solutions/approaches exist for this problem?
- How will you evaluate whether your model is good (metrics, validation strategy)?
- What libraries/frameworks do you intend to use?

Sources of Inspiration

1. Author(s), "Title," Venue/Year.
2. Author(s), "Title," Venue/Year.

8 TA Consultation Summary

[Summarize what you discussed with your TA, the advice/feedback they provided, and how it influenced or changed your project plans.]
